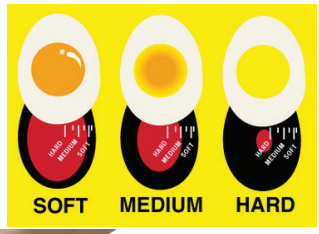
Burton Cooking Tools

Creator and Manufacturer of Innovative Color-Changing Thermometer Technology and Other Cooking Tools and Gadgets

Egg Per'fect Color-Changing Egg Timer and Caddy

The original color- changing egg timer...since 1978!

This heat sensitive timer changes color shows when eggs are soft, medium, or hard boiled so you will have perfectly cooked eggs every time.



Just put the Egg Per'fect Egg Timer in the pot with eggs and as the water boils the timer will change colors to show you when your eggs are just the way you want them.

The Egg Per'fect Egg Caddy holds the Egg Timer plus 4 eggs.

Easily cook up to 4 eggs exactly the way you want them.

The silicone handle says cool so you can remove the eggs all at once.

Cooked Per'fect Color-Changing Thermometer (Individual Collection)

This reusable color changing thermometer, available for poultry and pork, beef, and fish, will show you when your meat is ready.

Unlike traditional thermometers you don't have to remember the correct cooking temperature for a particular type of meat.

Just insert the Cooked Per'fect Thermometer into the meat for 3-5 seconds and remove.

The thermometer tip will change color to show you when your meat is cooked to your desired doneness.

Cooked Per'fect Color-Changing Thermometer (Complete Collection)

This reusable color changing thermometer will show you when your beef, fish, poultry, or pork is ready.

Insert the double-sided tip of the Cooked Per'fect Complete or Complete XL into the meat for 3-5 seconds and remove.

The thermometer tip will change color to show you when your meat is ready. Beef is shown on one side and fish and poultry on the other

The longer handle on the Cooked Per'fect Complete XL makes it perfect for outdoor grilling!

Pasta Per'fect Color-Changing Pasta Timer

This pasta timer changes color to show when your pasta is ready.

Just add your pasta to boiling water and then add your Pasta Per'fect.

The timer floats in the water and changes color to show you when your pasta is cooked to perfection!

Micro-Temp Per'fect Color-Changing Microwave Thermometer

This color changing thermometer is designed for microwave cooking.

For solid foods, insert the thermometer into the food for 3 seconds
For liquid or soft foods insert the thermometer and stir for 3 seconds.

The MicroTemp Per'fect will tell you if your food is warm or hot and ready to eat.
